## About Wisk

Wisk is a leading Advanced Air Mobility (AAM) company and developer of the first all-electric, self-flying air taxi in the U.S.

Wisk is an independent company, backed by The Boeing Company and Kitty Hawk Corporation, with over a decade of experience and over 1500 test flights. Since 2010, Wisk has designed, developed, and tested five generations of aircraft and is currently developing its 6th generation autonomous eVTOL aircraft.

- Founded: 2010
- People: ~360, with most in engineering, manufacturing, and flight test
- Locations: Bay Area CA (HQ), Atlanta GA, and New Zealand
- Patents Issued: >140
- Test Flights: +1,500 (full-scale aircraft)
